

METRIC CONVERSIONS PRACTICE 2

1. Convert 411 kg to g.

2. Convert 5626 L to cL.

3. Convert 2.5 cm to m.

4. Convert 13005 mg to g.

5. Convert 48.66 L to dL

6. Convert 521.85 cm to mm.

7. Convert 99.04 dm to cm.

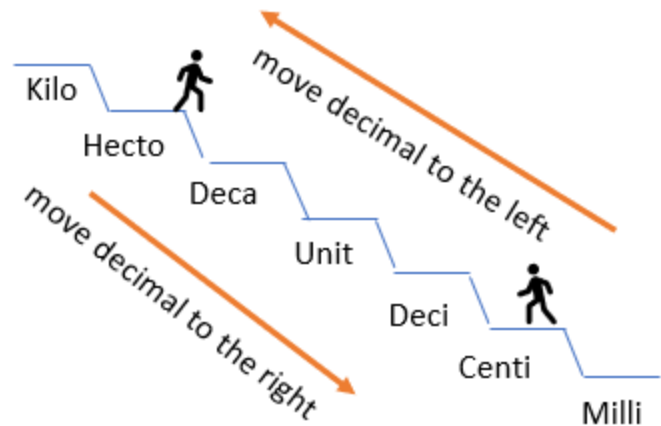

8. Convert 8.106 hg to cg.

9. Convert 4 g to mg

10. Convert 9 mm to m.

11. The weight of a typical flash drive is 3 grams. Convert the measurement to centigrams.

12. The distance between the T-Mobile Store and the Sprint store is 87 m. Convert the measurement to cm.

13. In order to install the satellite dish, the technician had to use 76.2m of wire.
- Convert the length of the wire to decameters.
 - Convert the length of the wire to centimeters.
14. A Bluetooth speaker supports an indoor range of 4, 572 cm.
- Calculate the length in meters.
 - Calculate the length in kilometers
15. When designing chromebook carts, you must consider the mass of the computer. The typical laptop weighs 4 kg.
- Calculate the mass of a chromebook in grams.
 - Calculate the mass of a chromebook in milligrams.
16. A chocolate chip cookie recipe calls for 200g of chocolate chips.
- Calculate the amount of chocolate needed in cg.
 - Calculate the amount of chocolate needed in mg.
17. The same recipe calls for 15.05 dkg of butter.
- Calculate the amount of butter needed in g.
 - Calculate the amount of butter needed in cg.
