

Rock Candy

An Unexplainably Juicy Activity

For each part of the simulation you completed, describe what you literally did and the rock cycle process it represents.

Part 1:

What steps did you literally take?

Describe the process(es) these steps represent.

1. What type of rock did you create in this part of the simulation? How do you know?

Part 2:

What steps did you literally take?

Describe the process(es) these steps represent.

2. What type of rock did you create in this part of the simulation? How do you know?

Part 3:

What steps did you literally take?

Describe the process(es) these steps represent.

3. What type of rock did you create in this part of the simulation? How do you know?
