

Draw a diagram that will help your group members visualize your part of the water cycle.

Answer these 3 questions about your topic:

1. What is your part of the cycle and where does it take place?

2. Why is your part of the water cycle important?

3. How does your part of the water cycle interact with or contribute to the other parts of the cycle?

SCIENCE JIGSAW:

Notes & Response Guide for Experts

Jigsaw Topic: _____

1. While studying your expert materials, mark up your article(s) and use the spaces below to write six (6) important facts about your subject matter to take back to your Home Group.

What does
your Home
Group need
to know?

Consider
including
definitions of
key terms,
important
