

# Water Cycle Concept Map

Name:

Date:

Class:

The **Water Cycle** is:

**Thermal Energy** "drives" the water cycle by:

## Water's Movement

Use words and pictures to describe each part of the water cycle

### Into the Atmosphere

Evaporation:

Transpiration:

### Returning to Earth

Condensation:

Precipitation:

### On Earth

Surface Runoff:

Accumulation:

Infiltration:

Groundwater and Aquifers:

Groundwater Discharge:

Name two ways **Gravity** helps propel the water cycle:
