

WATER CYCLE SPINNER DIRECTIONS

After watching the Study Jams Video about the basic parts of the water cycle, draw a combination of words and images in each space of the large oval that represents the three parts of the water cycle mentioned (Evaporation, Condensation, and Precipitation).

Cut out your oval and glue it to a sheet of construction paper. Cut out the arrow below and use a brass fastener to attach it to the center of your images. You have just created your very own water cycle spinner. Bring it to class for use in classroom activities this week!
